Vantage offers a wide range of special surfactants for cosmetic formulations, such as hair conditioning agents, emulsifiers and mild surfactants. Our products for personal care are tailor-made and can be adapted to your specific needs. The products shown below cover specific applications such as baby care, men’s care, hair styling & perfumes.

Vantage specifies the ethoxylation/propoxylation degree according to your specific needs. The product range presented herein is not conclusive, as a specialist for ethoxylation we are able to produce different surfactants based on your requirements.

Mild surfactants

With Metaupon™ OMT, Metaupon™ KMT and Sodium Isethionate we provide mild surfactants for all sensitive skin applications: Baby care, facial cleanser and hair care products. They combine good detergency with rich, dense foaming properties. Metaupon™ OMT, KMT and Sodium Isethionate are very effective as co-surfactants and compatible with all nonionic & anionic surfactants. They stand out due to their stability over a broad pH range and their hard water resistance. These products can be used in liquid soaps of all types, syndet, combo bars & bubble baths with rich lather.

O/W-Emulsifier

Our Leunapon range with its outstanding emulsifying properties covers a variety of applica-

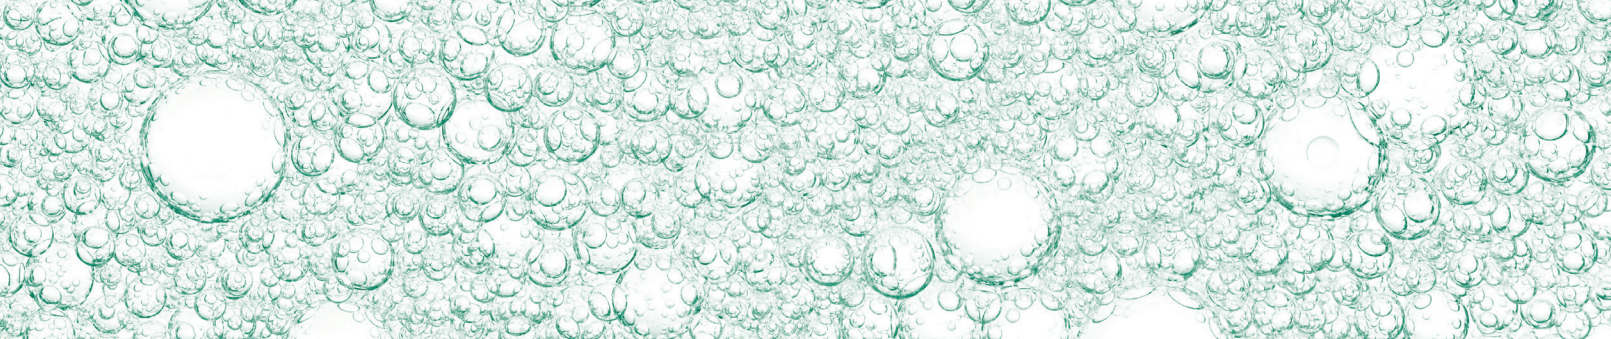

tions. As O/W emulsifiers the Leunapon range can be used in body creams and lotions, hair conditioners, decorative cosmetics, deodorants & antiperspirants. The Emulgator E30™ is an excellent emulsifier suitable for shampoos, liquid soaps & washing pastes. We offer an assortment of ethoxylated emulsifiers from Ceteareth-2 & Cetolet-2 up to Ceteareth-80 & Cetolet-25.

Humectants

The Leunapon™-GN range serves as effective humectant for creams & lotions. It provides lubricity and a smooth feel to shaving cremes & aftershaves. On request we provide different ethoxylation grades of Glycereth according to your specific needs.

Solubilizers

We provide two different types of solubilizers: The natural based Leunapon™-ER range and the Leunapon™-F 1214/x/Py series. Both act as solubilizers in shampoos, liquid soaps & deodorants. Leunapon™-ER is also suitable for creams & lotions.
